MicrocynAH[®]

ANIMAL HEALTH

The only Animal Healthcare Products formulated with the original and patented Microcyn[®] Technology!

VETERINARIAN RECOMMENDED

Microcyn[®] Technology has successfully treated over ten million patients, both two-legged and four, over the past decade. Proven safe and effective in over thirty clinical trials and in thousands of veterinarian offices, the proprietary Hypochlorous Acid found in the Microcyn[®] animal healthcare products is highly self stable, efficacious and non-toxic.

From home to ranch to farm, the MicrocynAH[®] products deliver consistently safe and stable formulations for cleaning and debriding wounds, skin rashes, ulcers, hot spots, cuts, burns, post-surgical sites, sores and lacerations. As well, the MicrocynAH[®] ear formulation is customised for cleansing outer ears.

With no dilution or rinsing required, MicrocynAH[®] can be used on animals of all ages and species. It is safe for use in the outer ear and nose skin. Insist on the original Microcyn[®] Technology available only in the MicrocynAH[®] family of animal healthcare products.

MicrocynAH® Wound and Skin Care is intended for the OTC management of skin abrasions, lacerations, minor irritations, cuts and intact skin.

The only animal healthcare products to be formulated with the original and patented Microcyn® Technology with 45 patents worldwide.

- ✓ Safe if licked or ingested
- ✓ Safe for use on all animals of all ages and species
- ✓ Opaque packaging to reduce photo-stability issues
- ✓ No dilution or rinsing required
- ✓ Safe and non-toxic, contains no boric acid*
- ✓ Steroid-free and antibiotics-free
- ✓ Does not harm healthy mammalian tissue
- ✓ No alcohol

* Long-term exposure to boric acid can cause kidney damage and eventually kidney failure.
